

We are going to make sure that teaching and learning in writing is even better than it already is.

What are we doing to improve our school this year?

We want to improve everyone's learning in Mathematics. We are all going to be using Power Maths to support us.

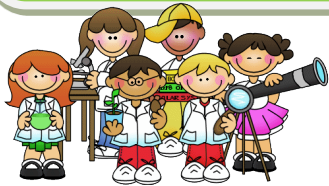

We are going to make sure that learning in science is exciting and that children know how they can become great scientists.

We are going to build a new curriculum that inspires everyone to achieve and flourish.

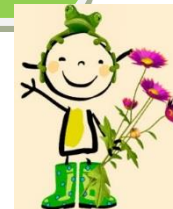

We want to improve lunch times for everyone.

We want to continue to make our outdoor learning fun and exciting. Everyone will take part in a Forest school this year.

We want to make sure all children are in school learning. We are going to be checking children's attendance carefully identifying children who are not in school regularly. We want to make attendance count.

We want to make sure that the children and parents have the chance to tell us what we are doing well and what the school can do to be better.
