

We are going to make sure that teaching and learning in writing is even better than it already is.

We want to improve everyone's learning in Mathematics. We are all going to be using Power Maths to support us.

What we did:

We introduced Talk for Writing in every class. All children and staff know how to use it to help with their writing. Governors supported this by coming to visit and talking to teachers and children.

What are we doing to improve our school this year?

What we did:

Staff went on training for Maths Mastery and have been using it in their classrooms. Governors supported this by coming to visit and talking to teachers and children.

We are going to make sure that learning in science is exciting and that children know how they can become great scientists.

We want to improve lunch times for everyone.

We are going to build a new curriculum that inspires everyone to achieve and flourish.

What we did:

Staff looked carefully at the curriculum and made lessons more interactive. Staff and children also worked hard to gain the Primary Science Quality Mark for our school.

What we did:

We had a lunch time audit to find out what we could improve about lunch times. We now have a salad bar, a choice on our menu, new tables and a VIP table on a Friday. We also have a School Nutrition Action Group. Governors helped by having lots of meetings, observing and making decisions.

What we did:

Staff researched a new curriculum called cornerstones. You can read all about this on our website. We introduced this in the summer term and are going to work hard to implement it next academic year.

We want to make sure all children are in school learning. We are going to be checking children's attendance carefully identifying children who are not in school regularly. We want to make attendance count.

We want to continue to make our outdoor learning fun and exciting. Everyone will take part in a Forest school session this year.

What we did:

We now have two trained Forest School leaders. Everyone in school has a weekly session. We all have waterproof clothes to wear and new equipment for the outdoors. Governors supported this by coming to visit and talking to teachers and children.

We want to make sure that the children and parents have the chance to tell us what we are doing well and what the school can do to be better.
