

Adventurers: Autumn 2 2019

Where does snow go?

Let it snow! Let it snow! Let it snow! Why does snow melt? How can we keep warm? It's time to explore the frosty but fascinating season of winter.

This half term, we'll wrap up warm and head outside for a winter walk to spot frosty windows, icy puddles, icy grass and steamy breath. Back in the classroom, we'll warm up with some fruit crumble we have made ourselves. We will observe ice melting and discover how it turns into water? We will look at a range of winter-themed books. Using our mathematical skills, we'll count snowflakes and stick the correct amount of buttons onto numbered snowmen and create our own snowmen out of 2D shapes. Getting creative, we'll create winter-themed art, make our snowmen in snowman week! At the end of the topic we shall take part in the Christmas Performance.

Areas of Learning	Early Learning Goals
Personal, Social and Emotional	Making Relationships
Communication and Language	Listening and Attention, Understanding and Speaking
Physical Development	Moving and Handling and Health and Self Care
Literacy	Reading and Writing
Mathematics	Number and Shapes, Space and Measure
Understanding the World	The World and Technology
Expressive Art and Design	Exploring and Using Materials Media and Materials and Being Imaginative.

How you can help?

Help your child prepare for their project Snow is magical! Why not make a wish list of all the things you would like to do in the snow together - sledging, snow angels, building a snowman. You never know; snowy weather might be just around the corner!
